FRIDAY 29TH JANUARY 2010

LET THERE BE LIGHT

THE MUCH ANTICIPATED MOMENT HAS FINALLY ARRIVED AND ANOTHER PIECE OF NEW SOUTH WALES HARNESS RACING HISTORY WILL BE ACHIEVED TONIGHT AT TABCORP PARK MENANGLE.

Having originally aimed for a January launch, the NSW Harness Racing Club will achieve their objective of turning on the new state-of-the-art lighting system at the facility this Friday.

The meeting is the first night fixture transferred from Harold Park to Menangle by the NSWHRC and is also another step in the club transferring its full-time operations to the outer suburbs of Sydney.

Of course, Tabcorp Park Menangle will become New South Wales' new home of harness racing once the iconic Harold Park site is sold.

"This is another giant step forward for the Club in its transition to the Macarthur region," Chief Executive John Dumesny said.

"We now have the best track and lighting in Australasia and look forward to the other infrastructure developments on the sale of the Harold Park property."

The lighting system has been installed by world leaders Mussco Lighting, who was responsible for installing the lights at Harold Park and countless other sporting venues around the globe.

In a victory for the environment, Mussco's revolutionary system reduces energy consumption by up to 50 percent when compared to conventional systems, meaning less carbon emissions being released into the environment.

The 'Green Lighting System' also guarantees constant light and cuts spill by 50 percent.

The lighting system is powered by two generators. In further future planning for Tabcorp Park Menangle, the generators have sufficient excess capacity to power a proposed new race stalls building.
